# Introduction

This presentation is prepared to introduce ThreatMon company and ThreatMon. ThreatMon is a solution developed to provide businesses with a comprehensive cyber security solution to protect their digital assets from external threats.

We aim for you to understand the values provided by our product and to see its potential benefits.

**88%**

of companies now consider cybersecurity a critical business risk

Gartner

**$4.3M**

is the average cost of a data breach in 2022, a 12.7% increase from the last year

IBM

**100+**

countries have laws imposing a personal liability on executives for a data breach

ImmuniWeb

ThreatMon

*"It takes 20 years to build a reputation and only a few minutes of cyber attack to destroy it."*

ThreatMon

# About ThreatMon

ThreatMon is a technology company specialising in providing comprehensive cyber security solutions tailored to the specific needs of businesses.

ThreatMon offers an intelligence-driven cyber security solution. Founded in 2018, our company is dedicated to protecting digital assets from external threats.

ThreatMon

**Our mission** is to enable security teams to instantly discover cyber threats with quality, innovation, precision and expertise that exceeds the expectations of our customers and partners by providing a service that delivers superior value. We believe that people are at the centre of threat operations.

We stay true to our core values in everything we do with colleagues, partners and customers.

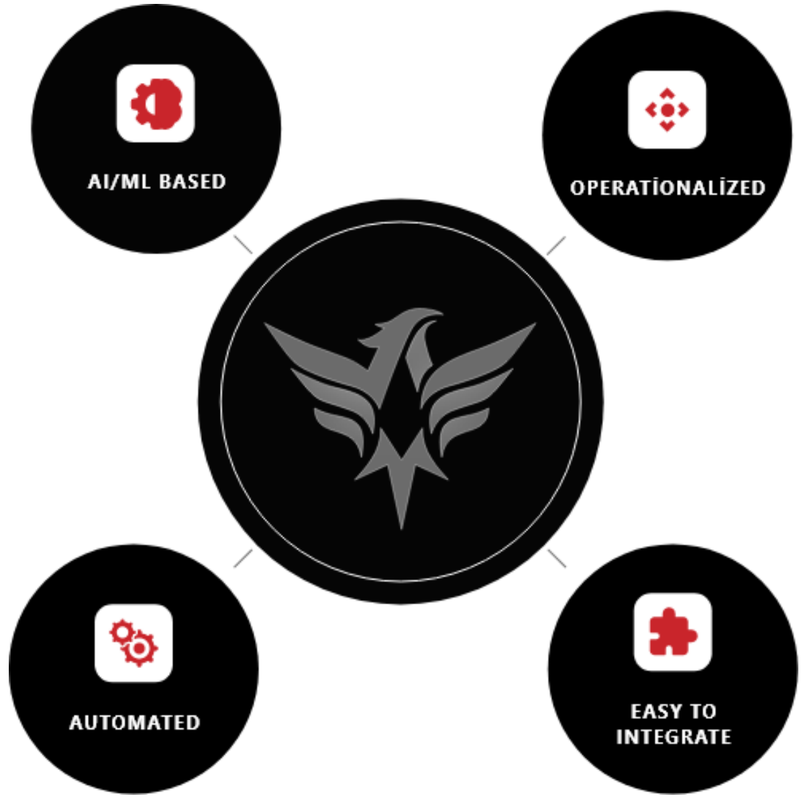

**Our vision** is to rank first in the world with our constantly growing human resources, business partners and 100% customer satisfaction principle.

# ThreatMon Modules

## About Cyber Threat Intelligence

Cyber Threat Intelligence (CTI) is a vital process that enables organizations to anticipate and mitigate cyber-attacks. It helps in the early detection of threats, strengthens defense strategies, improves risk management, and combats various cyber threats such as data breaches and ransomware attacks. By implementing CTI processes, organizations can enhance their cybersecurity, detect attacks in advance, and protect their data effectively.

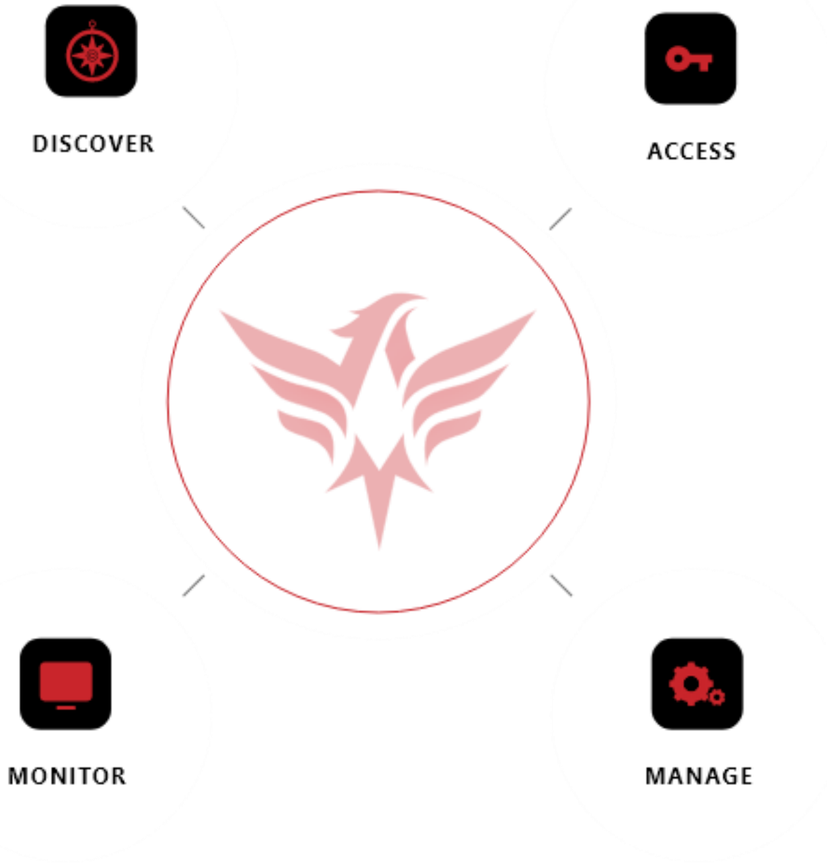

### Key Capabilities

- Improve defenses by understanding cyber crime actors, motivations, and behaviours targeting your organization.
- Provide proactive defense and timely mitigation with real-time updates on emerging threats with module continuous monitoring capabilities.
- Get customizable threat intelligence feeds tailored to the specific needs of organizations.

## About Attack Surface Management

Although the continuous increase in organisations' digital assets expands the attack surface, it is possible to dominate digital assets with the right attack surface management solutions. The right Attack Surface Management solution identifies the attack surfaces that organizations have, detect security threats on the attack surface, and provides recommendations for eliminating threats.

### Key Capabilities

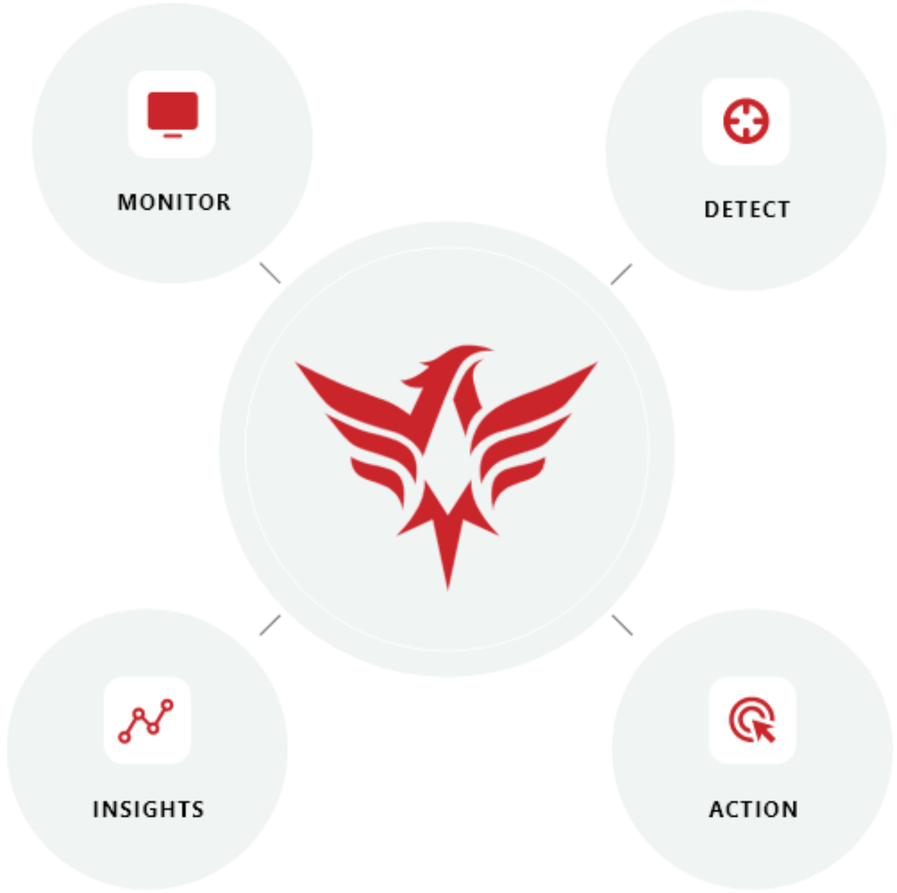

- Discover your organization's external digital assets and continuously track them for security threats.
- Be notified immediately when a new vulnerability is discovered on your assets.
- Perform advanced anomaly detection on your digital assets.

## About Digital Risk Protection

Digital Risk Protection is a proactive strategy that safeguards organizations against evolving cyber threats. ThreatMon protects critical digital assets and sensitive data through advanced technologies and continuous monitoring.

### Key Capabilities

- Protect your organization's digital assets and sensitive data from cyber threats.
- Proactively monitor threat detections and rapid response measures.
- Minimize risks and keep your organization safe with ThreatMon's robust security measures.

ThreatMon

# Features at a Glance

## Attack Surface Management

- Digital Asset Detection & Continuous Monitoring
- Vulnerable Asset Intelligence
- Real-time Dashboards
- ThreatMon Asset Risk Scoring
- Mobile Application Security Intelligence
- DDoS Intelligence
- SSL Security Monitoring
- Passive Vulnerability Scan
- Continuous Pentest
- Customized Alarm & Notification

## Threat Intelligence

- AI/ML-based Threat Intelligence
- Threat Hunting
- Threat Activity Alerts
- Customer API Integration
- Vulnerability Intelligence
- Dark web Intelligence
- Security News
- Threat Reports
- APT MITRE ATT&CK and Graph Threat Feeds
- Threat Feed/IOCs Integration

## Digital Risk  Protection

- Fraud Detecion
- VIP Protection
- Social Media Monitoring
- Security Posture Card
- Phishing / Impersonating Domain Monitoring
- Integrated Takedown
- Critical Data Breach Monitoring
- Reputation Tracking
- Deep / Dark web Asset Monitoring
- Github / Gitlab Intelligence
- Social Media Intelligence

# Uncover the Advantages of the ThreatMon's Module Offerings

ThreatMon

# Uncover the Advantages of the ThreatMon's Module Offerings

**Extensive Integrations**

Use extensive integrations and alignment with all your security programs, third-party security tools, and external repositories.

**Advanced Intelligence Platform**

ThreatMon enables in-depth analysis of intelligence data and prediction of threats, enabling security measures to be taken more effectively.

**All-in-One Platform**

View and manage security threats on your assets or in the outside world that could affect your company in one place.

ThreatMon

**Real-time Dashboard**

View all threats that may directly or indirectly affect your organization and new emerging threats in real-time with their analysis.

**AI-ML based Intelligence**

Informs your organization about future threats in advance with threat detection methods trained with Artificial Intelligence and Machine Learning model.

**%100 Cloud**

ThreatMon provides higher availability and flexibility by eliminating the dependency on physical servers.

ThreatMon

**Optimized Costs**

ThreatMon provides services with the most profitable service/cost ratio for your business.

**Custom API Integration**

ThreatMon provides high-level security by easily integrating with other security products with a personalized AP in line with your needs.

**Advance Automation**

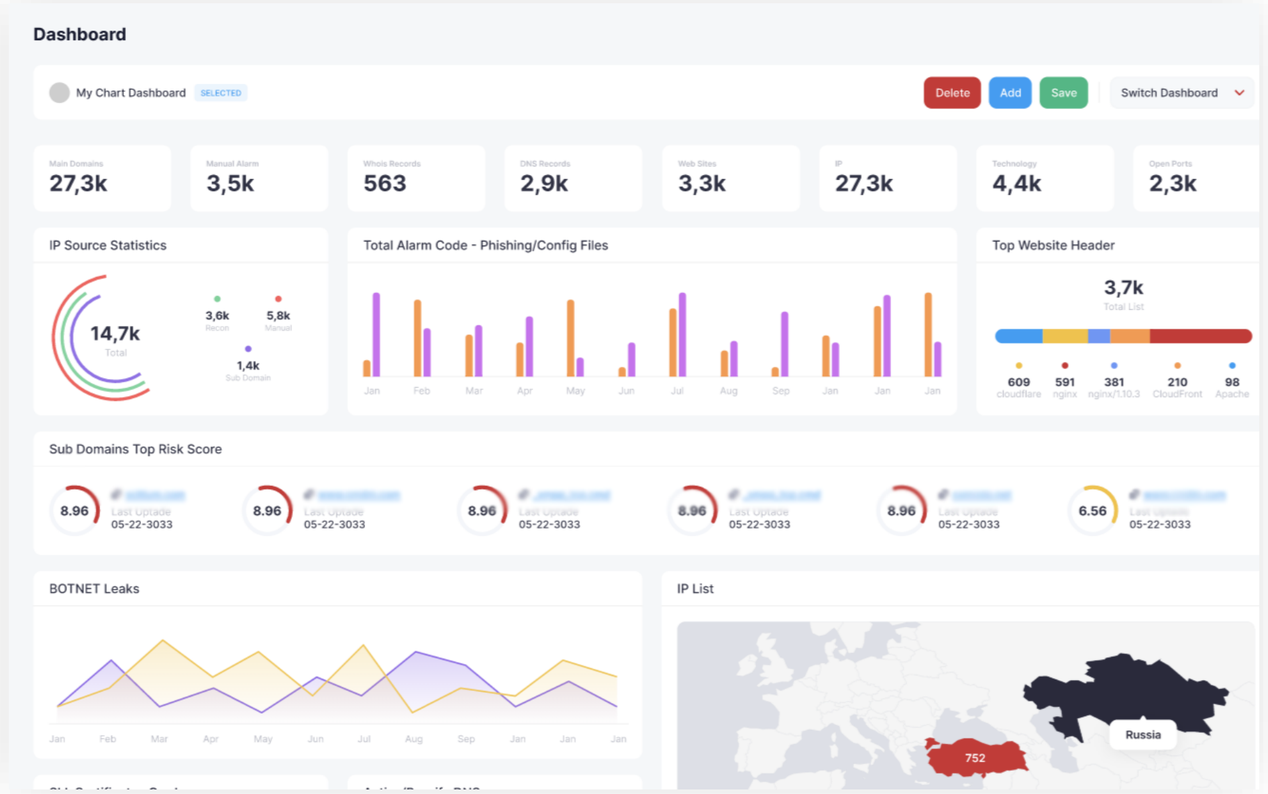

ThreatMon uses Advance Automation capabilities to effectively detect security problems with a minimum false/positive rate and provides immediate notification.

ThreatMon

# Featured Key Capabilities

- Identify the external assets of your business.
- Ensure continuous monitoring of your digital coverage.
- Instantly see your assets affected by Zero Day vulnerabilities.
- Monitor and manage your organisation's online reputation.
- Monitor activity on social media platforms, deep/dark web and rogue apps.
- Detect digital risks such as source code leakage and account leakage.
- Access information about possible attacks, the latest malware types and existing vulnerabilities.
- Stay informed about emerging risks and potential security breaches.
- Stay update on the latest threats and vulnerabilities.

ThreatMon

# Our Features That Make Us Different

- We prevent time and resource waste with a low false positive rate.
- We respond effectively to customer needs with fast response times.
- We provide comprehensive internal and external security protection through our ThreatBlade solution.
- Our user-friendly interface facilitates the rapid adoption of our solution.
- We offer customers 30 days of premium access.
- Our experienced team detects critical findings, assisting in better safeguarding their businesses.
- Our AI-based algorithms analyze data and provide intelligent recommendations, enabling customers to make smarter and more efficient decisions.

ThreatMon

# Customer Reviews

"I appreciate ThreatMon's ability to provide organizations with a comprehensive view of external threats. Integrating Managed Security Service Provider (MSSP) panel usage allows managed security service providers to offer their customers a holistic understanding of external threats."

*- Technical Teams Manager*

"Our institution, which holds a significant presence globally, relies on numerous outsourced services. Managing, tracking, and controlling these services has proven to be quite challenging.' However, with ThreatMon, we now seamlessly handle these tasks. ThreatMon conducts regular activities, investigates system vulnerabilities, detects and reports brand threats, and, most importantly, presents all findings user-friendly."

*- Information Systems Operation and Technical Support Manager*

"ThreatMon consistently conducts thorough analysis and promptly reports the attack surfaces of our organization in response to external threats. Their cloud-based platform enables us to efficiently access and track data, facilitating effective threat monitoring and response."

*- Chief Information Technology Officer*
